HOW MUCH MULCH DO I NEED?

Based on applying mulch at a recommended thickness of 3", follow these three steps to determine how much mulch you will need.

1. Measure the area you want to cover by multiplying (in feet) the length and width
2. Divide your result by 9.
3. Divide this result by 12. Your answer is how many square yards of mulch you need to buy.

Example: The area you wish to cover is about 50 feet by 15 feet.

1. 50 feet x 15 feet = 750
2. 750 divided by 9 equals 84 (I rounded up the exact result of 83.33 to 84).
3. 84 divided by 12 equals 7. You need 7 yards of mulch to complete your project.

You can also go to www.colorenrichedmulch.com and use the simple and quick MULCH CALCULATOR provided by Heartland Enriched Colorants to do all the math for you.
